

Massachusetts Municipal Light Plant Solar Program

Program Details

The new Massachusetts Municipal Light Plant Solar Program allows residential customers of municipal light plants, such as the South Hadley Electric Department, to apply for a rebate for the purchase, installation, and usage of PV solar panels on their homes.

The program includes a solar rebate of up to \$1.20/watt, capped at 50% of total installed costs. Eligible solar installations must be for residential properties only, 10 kW or less, with less than 20% shading, and facing between 150 and 270 degrees. Other restrictions may apply.

How to Apply

Interested customers should submit an interconnection application with SHELD for pre-approval, then submit a rebate application with the Massachusetts Municipal Wholesale Electric Company (MMWEC), SHELD's joint action agency. The rebate form can be found online at www.mmwec.org. Customers may call 413-308-1311 to check application status.

Application deadline is June 15, 2020; rebate subject to availability.

Step One

Obtain pre-approval from SHELD and submit application to MMWEC. Upon successful review, MMWEC will forward it to the Massachusetts Department of Energy Resources (DOER).

Step Two

After the DOER evaluates the application, customers will be notified of their rebate status.

Step Three

Upon approval, customers have one year to schedule and complete installation of their solar panels. The rebate will be paid to the customer by MMWEC.
